First Space Shuttle Launch Visit

by Peter Jedicke

When the first space launch takes place in summer 1980, it is hoped that some R.A.S.C. members will be on hand to witness the historic event. In order to facilitate participation in this, it may be possible to obtain permission from the National Aeronautics and Space Administration to enter the viewing area which is relatively near the launch site. The R.A.S.C.'s National Council will have considered a plan at the meeting in Edmonton on December 9 to pass on to NASA a list of our members who will be attending.

Any members who are considering travelling to Florida for the first space shuttle launch and who would like to join other R.A.S.C. members near the launch site should have their names added to this list. This can be done by writing to RASC Space Shuttle Launch Visit, P.O. Box 842, Stn. B., London, Ontario, N6A 4Z3 before February 29, 1980. Members should include a description of plans for travel, accomodation and observing activities.
